## CONTENTS OF VOLUME 100

### NUMBER 1, AUGUST 1989

CRISTINA SUÑOL, JOSEP M. TUSELL, EMILIO GELPÍ, AND EDUARD RODRÍGUEZ-FARRÉ. GABAergic Modulation of Lindane (γ-Hexachlorocyclohexane)-Induced Seizures ..... 1

YOGENDRA SINGH, LINDA ULRICH, DONNA KATZ, PATRICK BOWEN, AND GOPAL KRISHNA. Structural Requirements for Anthracycline-Induced Cardiotoxicity and Antitumor Effects 9

T. R. HANLEY, JR., A. M. SCHUMANN, P. W. LANGVARDT, T. F. RUSEK, AND P. G. WATANABE. Metabolism and Disposition of Ethylene Carbonate in Male Fischer 344 Rats ..... 24

D. J. P. BASSETT, C. L. ELBON, S. S. REICHENBAUGH, G. A. BOSWELL, T. M. STEVENS, M. C. MCGOWAN, AND J. S. KERR. Pretreatment with EDU Decreases Rat Lung Cellular Responses to Ozone ..... 32

DANIEL GOON AND CURTIS D. KLAASSEN. Dosage-Dependent Absorption of Cadmium in the Rat Intestine Measured *in Situ* ..... 41

GUOHONG ZHANG AND JAMES L. STEVENS. Transport and Activation of *S*-(1,2-Dichlorovinyl)-L-cysteine and *N*-Acetyl-*S*-(1,2-dichlorovinyl)-L-cysteine in Rat Kidney Proximal Tubules .. 51

ROBERT A. ANDERSON, JR., SALLY H. BERRYMAN, JACK F. PHILLIPS, KENNETH A. FEATHERGILL, LOURENS J. D. ZANEVELD, AND LONNIE D. RUSSELL. Biochemical and Structural Evidence for Ethanol-Induced Impairment of Testicular Development: Apparent Lack of Leydig Cell Involvement ..... 62

JAMES D. SUN, ALAN R. DAHL, JAMES A. BOND, LINDA S. BIRNBAUM, AND ROGENE F. HENDERSON. Characterization of Hemoglobin Adduct Formation in Mice and Rats after Administration of [$^{14}$C]Butadiene or [$^{14}$C]Isoprene ..... 86

MARIO RIVERA, WEI ZHENG, H. VASKEN APOSHIAN, AND QUINTUS FERNANDO. Determination and Metabolism on Dithiol Chelating Agents. VIII. Metal Complexes of *meso*-Dimercaptosuccinic Acid ..... 96

F. WILLIAM SUNDERMAN, JR., SIDNEY M. HOPFER, SHAN-MEEI LIN, MARILYN C. PLOWMAN, TOMISLAV STOJANOVIC, STEVEN H-Y. WONG, ODETTE ZAHARIA, AND LINDA ZIEBKA. Toxicity to Alveolar Macrophages in Rats following Parenteral Injection of Nickel Chloride .... 107

B. D. ABBOTT, J. J. DILIBERTO, AND L. S. BIRNBAUM. 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin Alters Embryonic Palatal Medial Epithelial Cell Differentiation *in Vitro* ..... 119

PAUL L. RONEY AND ANDRIJ HOLIAN. Possible Mechanism of Chrysotile Asbestos-Stimulated Superoxide Anion Production in Guinea Pig Alveolar Macrophages ..... 132

M. H. FEUSTON, K. R. BODNAR, S. L. KERSTETTER, C. P. GRINK, M. J. BELCAK, AND E. J. SINGER. Reproductive Toxicity of 2-Methoxyethanol Applied Dermally to Occluded and Nonoccluded Sites in Male Rats ..... 145

J. CREECH KRAFT, B. LÖFBERG, I. CHAHOUD, G. BOCHERT, AND H. NAU. Teratogenicity and Placental Transfer of All-*trans*-, 13-*cis*-, 4-Oxo-all-*trans*-, and 4-Oxo-13-*cis*-retinoic Acid after Administration of a Low Oral Dose during Organogenesis in Mice ..... 162

P. I. EACHO, P. S. FOXWORTHY, R. D. DILLARD, C. A. WHITESITT, D. K. HERRON, AND W. S. MARSHALL. Induction of Peroxisomal β-Oxidation in the Rat Liver *in Vivo* and *in Vitro* by Tetrazole-Substituted Acetophenones: Structure–Activity Relationships ..... 177

IN MEMORIAM
I. GLENN SIPES. Bernard B. Brodie (1909–1989) ..... 185

ACKNOWLEDGMENT ..... 186

ANNOUNCEMENTS ..... 188

## NUMBER 2, SEPTEMBER 1, 1989

PHILLIP W. ALBRO, ROBERT E. CHAPIN, JEAN T. CORBETT, JOANNA SCHROEDER, AND JERRY L. PHELPS. Mono-2-ethylhexyl Phthalate, a Metabolite of Di-(2-ethylhexyl) Phthalate, Causally Linked to Testicular Atrophy in Rats ..... 193

TRAN C. CHANH, RACHEL I. HUOT, MICHAEL R. SCHICK, AND JOHN F. HEWETSON. Anti-idiotypic Antibodies against a Monoclonal Antibody Specific for the Trichothecene Mycotoxin T-2 ..... 201

C. YAO AND S. SAFE. 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin-Induced Porphyria in Genetically Inbred Mice: Partial Antagonism and Mechanistic Studies ..... 208

MICHAEL P. WAALKES AND JERROLD M. WARD. Induction of Hepatic Metallothionein in Male B6C3F1 Mice Exposed to Hepatic Tumor Promoters: Effects of Phenobarbital, Acetaminophen, Sodium Barbital, and Di(2-ethylhexyl) Phthalate ..... 217

ROBERT ZACZEK, GEORGE BATTAGLIA, JOSEPH F. CONTRERA, STEVEN CULP, AND ERROL B. DE SOUZA. Methylphenidate and Pemoline Do Not Cause Depletion of Rat Brain Monoamine Markers Similar to That Observed with Methamphetamine ..... 227

MERYL H. KAROL, JULIE A. HILLEBRAND, AND PETER S. THORNE. Characteristics of Weekly Pulmonary Hypersensitivity Responses Elicited in the Guinea Pig by Inhalation of Ovalbumin Aerosols ..... 234

PETER S. THORNE AND MERYL H. KAROL. Association of Fever with Late-Onset Pulmonary Hypersensitivity Responses in the Guinea Pig ..... 247

LYDIA VINCIC, F. WILLIAM ORR, DEBORAH J. A. WARNER, KAYE L. SUYAMA, AND J. MICHAEL KAY. Enhanced Cancer Metastasis after Monocrotaline-Induced Lung Injury ..... 259

AHMED E. AHMED, SALAH A. SOLIMAN, JIANN-PING LOH, AND G. I. HUSSEIN. Studies on the Mechanism of Haloacetonitriles Toxicity: Inhibition of Rat Hepatic Glutathione *S*-Transferases *in Vitro* ..... 271

A. L. KENNEDY, M. F. STOCK, Y. ALARIE, AND W. E. BROWN. Uptake and Distribution of $^{14}C$ during and following Inhalation Exposure to Radioactive Toluene Diisocyanate ..... 280

GLENN D. HOKE, RICHARD A. MACIA, PAUL C. MEUNIER, PETER J. BUGELSKI, CHRISTOPHER K. MIRABELLI, GLENN F. RUSH, AND WILLIAM D. MATTHEWS. *In Vivo* and *in Vitro* Cardiotoxicity of a Gold-Containing Antineoplastic Drug Candidate in the Rabbit ..... 293

RICHARD SOLOMON, STEPHANIE LEAR, ROBERT COHEN, KATE SPOKES, PATRICIO SILVA, JR., PABLO SILVA, MARCELA SILVA, HADLEY SOLOMON, AND PATRICIO SILVA. The Effect of Organotin Compounds on Chloride Secretion by the *in Vitro* Perfused Rectal Gland of *Squalus acanthias* ..... 307

M. ANN CLEVENGER, STEPHEN M. ROBERTS, DANNY L. LATTIN, RAYMOND D. HARBISON, AND ROBERT C. JAMES. The Pharmacokinetics of 2,2′,5,5′-Tetrachlorobiphenyl and 3,3′,4,4′-Tetrachlorobiphenyl and Its Relationship to Toxicity ..... 315

MATS HOLMSTRÖM, BRITTA RYNNEL-DAGÖÖ, AND BO WILHELMSSON. Antibody Production in Rats after Long-Term Exposure to Formaldehyde ..... 328

ALAN R. DAHL. The Fate of Inhaled Octane and the Nephrotoxicant, Isooctane, in Rats ..... 334

JOHN F. BRADY, DECHUN LI, HIROYUKI ISHIZAKI, MAOJUNG LEE, SHU M. NING, FANG XIAO, AND CHUNG S. YANG. Induction of Cytochromes P450IIE1 and P450IIB1 by Secondary Ketones and the Role of P450IIE1 in Chloroform Metabolism ..... 342

JONATHAN M. DANIELS, JAMES F. BRIEN, AND THOMAS E. MASSEY. Pulmonary Fibrosis Induced in the Hamster by Amiodarone and Desethylamiodarone ..... 350

THERESA A. KIRLEY, BERNARD D. GOLDSTEIN, WIESLAWA M. MANIARA, AND GISELA WITZ. Metabolism of *trans,trans*-Muconaldehyde, a Microsomal Hematotoxic Metabolite of Benzene, by Purified Yeast Aldehyde Dehydrogenase and a Mouse Liver Soluble Fraction ..... 360

ANNOUNCEMENTS ..... 368

NUMBER 3, SEPTEMBER 15, 1989

KYU YONG JUNG, SHINICHI UCHIDA, AND HITOSHI ENDOU. Nephrotoxicity Assessment by Measuring Cellular ATP Content. I. Substrate Specificities in the Maintenance of ATP Content in Isolated Rat Nephron Segments ..... 369

KYU YONG JUNG AND HITOSHI ENDOU. Nephrotoxicity Assessment by Measuring Cellular ATP Content. II. Intranephron Site of Ochratoxin A Nephrotoxicity ..... 383

KENNETH E. THUMMEL, JOHN T. SLATTERY, SIDNEY D. NELSON, CAROLINE A. LEE, AND PAUL G. PEARSON. Effect of Ethanol on Hepatotoxicity of Acetaminophen in Mice and on Reactive Metabolite Formation by Mouse and Human Liver Microsomes ..... 391

ROSEANN L. VORCE AND JAY I. GOODMAN. Altered Methylation of *ras* Oncogenes in Benzidine-Induced B6C3F1 Mouse Liver Tumors ..... 398

KEVIN L. STARK AND MONT R. JUCHAU. Microinjection of Cultured Rat Embryos: A New Technique for Studies in Chemical Dysmorphogenesis ..... 411

DANIEL A. W. BUCKS, RONALD C. WESTER, MIR MOHAMMAD MOBAYEN, DIANE YANG, HOWARD I. MAIBACH, AND DONALD L. COLEMAN. *In Vitro* Percutaneous Absorption and Stratum Corneum Binding of Alachlor: Effect of Formulation Dilution with Water ..... 417

JOHN T. GATZY, T. ADAM AYERS, JOHN M. BOND, AND CURTIS HARPER. Effects of Na Saccharin Feeding and Urine on Barrier Properties of Excised Rat Urinary Bladder ..... 424

NOBUHIRO KONNO, KIYOSHI KATOH, TORU YAMAUCHI, AND MASAAKI FUKUSHIMA. Delayed Neurotoxicity of Triphenyl Phosphite in Hens: Pharmacokinetic and Biochemical Studies .. 440

RANDALL J. RUCH, KEITH A. CRIST, AND JAMES E. KLAUNIG. Effects of Culture Duration on Hydrogen Peroxide-Induced Hepatocyte Toxicity ..... 451

DIANE JANICK-BUCKNER, GERALD E. RANGES, AND MILES P. HACKER. Alteration of Bronchoalveolar Lavage Cell Populations following Bleomycin Treatment in Mice ..... 465

DIANE JANICK-BUCKNER, GERALD E. RANGES, AND MILES P. HACKER. Effect of Cytotoxic Monoclonal Antibody Depletion of T-Lymphocyte Subpopulations on Bleomycin-Induced Lung Damage in C57BL/6J Mice ..... 474

DAVID D. DUNCAN AND DAVID A. LAWRENCE. Differential Lymphocyte Growth-Modifying Effects of Oxidants: Changes in Cytosolic $Ca^{+2}$ ..... 485

RICK G. SCHNELLMANN, THERESA J. CROSS, AND EDWARD A. LOCK. Pentachlorobutadienyl-L-cysteine Uncouples Oxidative Phosphorylation by Dissipating the Proton Gradient ..... 498

KRIS ECKOLS, JUDY WILLIAMS, AND LYNDA UPHOUSE. Effects of Chlordecone on Progesterone Receptors in Immature and Adult Rats ..... 506

BEN VAN OMMEN, WILLEM HENDRIKS, JOS G. M. BESSEMS, GEERT GEESINK, FRANZ MÜLLER, AND PETER J. VAN BLADEREN. The Relation between the Oxidative Biotransformation of Hexachlorobenzene and Its Porphyrinogenic Activity ..... 517

BENGT ÅKESSON, ELLEN VINGE, AND STAFFAN SKERFVING. Pharmacokinetics of Triethylamine and Triethylamine-*N*-oxide in Man ..... 529

ANNOUNCEMENTS ..... 539

AUTHOR INDEX FOR VOLUME 100 ..... 540

SUBJECT INDEX FOR VOLUME 100 ..... 542

CHEMICAL INDEX FOR VOLUME 100 ..... 550

# Information for Authors

*Toxicology and Applied Pharmacology* publishes original scientific research pertaining to action on tissue structure or function resulting from administration of chemicals, drugs, or natural products to animals or humans. Manuscripts should address mechanistic approaches to physiological, biochemical, cellular, or molecular understanding of toxicologic/pathologic lesions and to methods used to describe these responses. Papers dealing with alternatives to the use of experimental animals are encouraged.

A limited number of short reviews on subjects of timely interest to toxicologists will be considered. Communications, Announcements, and Letters to the Editor are discussed below.

Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

**Manuscript handling fee**. The Society of Toxicology has established that a manuscript handling fee of $50.00, payable to the Society of Toxicology in United States currency, must accompany the original submission of the manuscript. The name(s) of the author(s) and the title of the manuscript must be included in the check identification information. In the event that this fee cannot be met by the authors or their institution, an explanatory letter must be sent to the Editor with the manuscript. The editorial decision regarding eventual acceptance or rejection of the manuscript will be independent of the submission of the handling fee.

**Submission of manuscripts**. All manuscripts should be submitted to: ***Toxicology and Applied Pharmacology,* Editorial Office, Seventh Floor, 1250 Sixth Avenue, San Diego, California 92101.**

**Form of manuscript**. Manuscripts should be submitted in quadruplicate (one original and three photocopies), in English, including four sets of figures. All copies of halftone photographs and electron micrographs *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. Papers in French or German can be considered for publication: authors should contact the Editor prior to submission. All manuscripts must be typewritten, double-spaced (including references) on one side of 8.5 × 11 in. white paper with 1 in. margins on all sides. Dot matrix printers should not be used.

*Page 1* should contain the article title, the names and affiliations of all authors, an abbreviated form of the title (not to exceed 40 characters including letters and spaces) and the name, telephone number, and complete mailing address of the person to whom all correspondence should be sent. The article title should be comprehensive and descriptive: proprietary names must not be used in titles, but may be identified in footnotes.

*Page 2* should contain an abstract starting with the title of the paper, followed by the authors' names and reference to *Toxicology and Applied Pharmacology*; blanks should be left so that the Editor may fill in the volume and page numbers. The abstract will be limited to 250 words but must contain a concise summary of what was done, the results obtained, and valid conclusions which are drawn therefrom. It must mention the compounds or families of compounds studied, their actions, and the species of animals. It must contain important words which are used as index terms, but not proprietary names.

*Example*: Immunoperoxidase Localization of T-2 Toxin. Lee, S. C., Beery, J. T., and Chu, F. S. (1984). *Toxicol. Appl. Pharmacol.* **72,** 228–235.

**Format**. The following text sections should be used.

**Introduction**. State why the investigation was carried out, note any relevant published work, and delineate the objective of the investigation.

**Methods**. New methods or significant improvements of methods or changes in old methods must be described. Methods for which adequate reference can be cited are not to be described. In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described: if an accepted code of practice has been followed, a reference to the relevant standards should be given. Details regarding animal housing conditions should be given.

**Results**. Duplication between the text of this section and material presented in tables and figures should be avoided. Tabular presentation of masses of negative data must be avoided and replaced with a statement in the text whenever possible. The statement must include (a) what was done, (b) how it was done, (c) how the data were analyzed, (d) a measure of variability, and (e) the significance of the result.

**Discussion**. This section must relate to the significance of the work to existing knowledge in the field and indicate the importance of the contribution of this study. Needless detailed recapitulation of the results must be avoided. Unsupported hypotheses and speculation should be omitted.

**References**. Names of authors are to be cited in the text with the year of publication in parentheses. When there are more than two authors use the first author's name followed by *et al.* All papers mentioned in the text must be listed in the reference list and vice versa. References should be listed alphabetically typed double-spaced on a separate sheet at the end of the paper with all authors included. Journal titles should be abbreviated according to *Chemical Abstracts Service Source Index,* 1985. Note the following styles for references.

GERHART, J. M., TILSON, H. A., HONG, J. S., AND UPHOUSE, L. L. (1983). Chlordecone-induced tremor: Quantification and pharmacological analysis. *Toxicol. Appl. Pharmacol.* **66,** 234–243.

RANDALL, C. (1977). Teratogenic effects of *in utero* ethanol exposure. In *Alcohol and Opiates* (K. Blum, Ed.), pp. 91–107. Academic Press, New York.

COLE, R. J., AND COX, R. H. (1981). *Handbook of Toxic Fungal Metabolites.* Academic Press, New York.

**Footnotes** should be identified in the text by superscript Arabic numerals and cited consecutively throughout the paper. All footnotes should be listed in order typed double-spaced on a separate sheet. Proprietary names of substances and names and addresses of suppliers should be identified in footnotes. If the paper has been presented orally in whole or in part, the date, and occasion should be included in a footnote.

**Tables** must be typed double-spaced on a separate sheet with the title typed directly above the table. Do not use abbreviations in the title. The title and footnotes must contain all the information necessary to understand and interpret the table without reference to the text. Tables must be numbered consecutively with Arabic numerals. Footnotes to tables should be identified by superscript lowercase letters [a,b] etc., and placed at the bottom of the page containing the table. Letters should be assigned to table footnotes alphabetically in order of appearance as the table is read *horizontally*, not vertically.

**Figures** should be numbered consecutively with Arabic numerals. All legends are to be typed consecutively on a separate sheet. All figures should be planned to fit the proportions of the printed page (5.5 × 8 in.; column width, 2.5 in.); wherever possible, figures will be reduced to single-column width. Lettering on the original figure should be large enough to be legible after reduction of the figure to single-column width (approximately 50 to 60%). *Differences in type size within a single figure should be no more than approximately 15%*. Standard mechanical lettering sets should be used. Characters should be approximately 3/16-in. high (Leroy lettering size 140). *In addition, symbols used to identify points within a graph should be large enough that they will be easily distinguishable after reduction.* Graphs should be plotted with black India ink on white paper no larger than 8.5 × 11 in. Grid lines that are to show must be inked in black.

All copies of halftone photographs and electron micrographs *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. Photographs must be kept to a minimum. Photographs should be glossy prints (5 × 7 or 8 × 10 in.). Overlays indicating the parts of the electron micrographs that are to be emphasized must be used. Electron micrographs should be submitted not larger than 6.5 × 4.5 in. Magnifications should be indicated in the figure legends. Illustrations in color can be accepted only if the authors defray the cost.

Identify all figures on the back, in *pencil,* with authors' names and figure number, and indicate the TOP.

**Index terms** suitable for use in the subject index must be submitted on a separate sheet. The list should include chemical name, generic name, common name, and may include proprietary name of each important substance used in the experiments. It should also include biological activity of each substance investigated. Terms should elucidate important relationships.

**Nomenclature**. For styling of isotope, enzyme, and biochemical nomenclature, consult the Information for Authors of the *Archives of Biochemistry and Biophysics*.

**Abbreviations**. Units will be in general accordance with the International System (SI) as adopted by the 11th General Conference on Weights and Measures. Periods are not used after abbreviations (note exceptions, e.g. in. for inches).

Common abbreviations to be used in this journal are:

| | | | | | |
|---|---|---|---|---|---|
| m | meter | M | molar | ip | intraperitoneal |
| cm | centimeter | mM | millimolar | iv | intravenous |
| mm | millimeter | μM | micromolar | po | oral |
| μm | micrometer | N | normal | LD50 | median lethal dose |
| nm | nanometer | Ci | Curie | LC50 | medial lethal concentration |
| kg | kilogram | $\bar{x}$ | mean | Hz | hertz |
| g | gram | ppm | parts per million | °C | centigrade |
| mg | milligram | cpm | counts per minute | sec | seconds |
| μg | microgram | dpm | disintegrations per minute | min | minutes |
| ng | nanogram | sc | subcutaneous | hr | hours |
| ml | milliliter | ic | intracutaneous | SD | standard deviation |
| μl | microliter | im | intramuscular | SE | standard error |
| mol | mole | | | TLV | threshold limit value |

**Reprints**. A reprint order form will accompany the proofs. Fifty reprints of each article (without covers) are supplied free of charge.

**Communications.** *Toxicology and Applied Pharmacology* will accept a limited number of brief reports of work that has progressed to the stage at which it is considered that the science of Toxicology would be advanced if the results were made available as soon as possible. These reports will be designated "Communications." Authors should submit short papers for this category of publication only when they believe that the rapid communication of the results is of the utmost importance to other investigators. The manuscript must be submitted in duplicate and conform strictly to the form and style of the journal. The length must be such that it will require no more than four pages in the present format of the journal, approximately 2500 words total.

**Letters to the Editor**. Letters to the Editor will be accepted for publication subject to Editorial Board approval, provided that the content deals with papers published in *Toxicology and Applied Pharmacology* and that the comments are of scientific value. Letters should be received within two months of mailing of the journal and should be no longer than 250 words. Introduction of new data will not be permitted. Each letter will be submitted to the author of the original paper in order that any reply may be published simultaneously with the letter.

**Announcements:** *Toxicology and Applied Pharmacology* will accept for publication announcements of interest to toxicologists such as notices of society meetings, symposia, or other matters.
